(13) Project Description:							
<p>In 2016, ADA Engineering completed a Master Plan Report for the Three Islands Safe Neighborhood District Guardhouse and Traffic Calming Project. The Master Plan outlined potential improvements to the guardhouses and to vehicle traffic and pedestrian safety in the Three Islands Safe Neighborhood District (TISND). This TRAF1 Project includes safety upgrades and esthetic improvements to the District's two entrances as well as more visible intersections of Atlantic Shores Blvd. and Three Islands Blvd., Parkview Drive and Three Islands Blvd. and</p>							
(14) Project Justification							
<p>The TRAF1 project was unanimously approved by the TISND Advisory Board and the Board of Directors. The initial funding for the Master Plan and the Engineering Design Plans have continuously been supported. The current funding of \$82,115 is for the Engineering Design Plans. The District has approximately \$655,000 dollars in available fund reserves. This project meets the City's priorities of safety and vibrant appeal.</p>

(13) Project Description:							
<p>Currently, the police department is under contract with Intralogic Solutions to replace and install 138 cameras Citywide at a cost of \$517,200 over 5 years. Overall, the City will have 250+ cameras once construction at our City parks and SNDs is complete. In August 2018, a resolution was passed to add an additional 37 LPRs to the City's main traffic arteries to capture the vehicle tags entering and exiting the City at a cost \$998,000</p>							
(14) Project Justification							
<p>Project established per direction of the City Commission during April 2015 to ensure specific visibility of funds associated with the fulfillment of this requirement. The estimates were derived from quotes provided by current vendors and current staffing salaries and benefits.</p>

(13) Project Description:							
The Police Department is seeking to implement a Drone Program by purchasing four (4) drones. This program would assign a drone to each of the four (4) Uniform Patrol Shifts. These drones would be deployed in search and rescue operations, traffic accident reconstruction, crowd monitoring during large events, fleeing suspect pursuits, natural disaster incident responses and crime scene processing. These drones are equipped with night vision and FLIR cameras which provide police the capability to read heat signatures increasing the chance of							
(14) Project Justification							
Unmanned Aircrafts are becoming an important tool to help improve officer safety, provide tactical support, and crime scene reconstruction. By utilizing the Axon Air Drone platform our agency will have the ability to ingest drone video directly into Evidence.com which is the same digital/evidence storage the department currently utilizes to retain the Axon Body Worn Camera (BWC) footage. This capability will ensure the chain of custody of the footage captured by securing the video on Evidence.com. This program will save time in search and rescue operations and protect the public/officers during critical incidents. Estimated costs were obtained by Axon Air.

(12) Reference							
(13) Project Description: Intelligence-led policing (ILP) is a crime prevention policing model that uses technology and intelligence gathering to analyze and forecast where, when, by whom and to whom crimes are more likely to occur. ILP uses multiple technology sources such as License Plate Readers, Prisoner and Parole websites, Intelligence Sharing databases and Social Media sources to gather intelligence and help develop a more accurate crime forecast. ILP is aided by crime prediction software such as predpol or Motorola analytics to analyze incidents of crime to							
(14) Project Justification Crime Prevention Policing Models have resulted in significant crime reduction in multiple jurisdictions nationwide. This crime prevention strategy has proven effective in mid-sized communities such as Hallandale Beach. All pricing has been derived from current personnel salaries and benefit costs, equipment and estimates provided by the software providers.

(13) Project Description: For the construction of a personal protective equipment room utilizing current interior bay floor space in the West end of the current fire station located at 101 Three Islands Blvd.																																			
(14) Project Justification To meet cancer prevention and storage standards for PPE. With the completion of the PPE room all three stations will have a separated and ventilated environment clear of hydrocarbons emissions. NFPA 1500 Standard on Fire Department Occupational Safety and Health Program. This project was approved in F2017/2018 budget and money was allocated to fund the project. The money was then cut to pay the rent on the old fire station building. Engineer and plans are already completed, may need to be reviewed and updated.

(12) Reference																															
(13) Project Description: Furnish a second set of personal protective gear (coat and pant) to all firefighting personnel.																															
(14) Project Justification NFPA and national safety recommendations state that firefighters should have a clean set of PPE to change into during periods when their main set is contaminated due to carbon and other bio hazard materials. As of now we only have one set of PPE per individual, meaning that when their gear is contaminated it must be washed without having a second set of PPE to use during emergency response. Also, when PPE is sent out for repair a second set is needed to use during this time.

(13) Project Description:							
For the purchase and installation of the Phoenix Station Alerting Systems.							
(14) Project Justification							
The new P25 County radio system once online requires that all fire stations in the County change out the old Z Tron alerting systems to the new Phoenix alerting systems. Pheonix was awarded the Broward County contract to provide the system and installation in all fire stations.

(13) Project Description: This project consists of placing all existing aerial utility lines underground starting from Tamarin Drive and ending at Holiday Drive. Background: During FY 2017-18, the Department of Public Works began to research the probability of undergrounding utilities in the Golden Isles Safe Neighborhood District (GISND). The utilities include FPL, cable/internet and phone. FPL was paid \$15,000 to begin a study to determine initial costs for the initiative. FPL requested a large amount of documentation from the City to continue the research. The City							
(14) Project Justification Placing all the utilities underground address safety concerns. It helps to minimize damages to utility lines during hurricane; it is more aesthetically appealing and may increase value of nearby properties.

TOTAL:	\$0	\$300,000	\$0	\$0	\$0	\$0	\$300,000																												
(12) Reference																																			
(13) Project Description: For the purchase and installation of equipment to enhance the Opti Com systems at traffic lights in the City.																																			
(14) Project Justification Many of the traffic lights in the City do not have functioning Opti Com systems which allow emergency vehicles to change signal lights to assist them in moving through traffic. Numerous intersections do not have Opti Com systems , and many that do are not working due to old technology.
